SUMMARY

Front-End Developer skilled in React, Next.js, and TypeScript. I focus on building fast, clean, and responsive interfaces, implementing authentication and API integration, and using modern state management tools like Redux Toolkit and React Query to deliver scalable, high-quality user experiences.

PROFESSIONAL EXPERIENCE

Front-End Developer Intern | Huma volve

- Built responsive UI components using React and TailwindCSS as part of real client projects.
- Integrated frontend with REST APIs and handled loading states, errors, and data rendering.
- Implemented reusable components and improved UI consistency across pages.
- Collaborated with senior developers using Git to manage versions and code reviews.

PROJECTS

Clinic Booking Web App — Front-End Developer (Team Project)

Tech Stack: React, TypeScript, Redux Toolkit, Shadcn/UI, TailwindCSS, Axios
Description:

- Implemented authentication (login, signup) and protected routes.
- Developed booking pages, profile management, and form validation with API integration.
- Collaborated with backend team to ensure smooth data flow and consistent error handling.

E-commerce "Bay3" — Front-End Developer

Tech Stack: Next.js, TypeScript, Zustand , React Query, Flowbite, TailwindCSS, Strapi CMS
Description:

- Built full product flow: listing, filtering, product details, and authentication.
- Connected the app with Strapi backend and optimized data fetching using React Query.
- Created a responsive UI and improved loading performance across components.

School-Education Website — Front-End Developer

Tech Stack: React, TypeScript, TailwindCSS
Description:

- Converted a Figma community design into a fully responsive, pixel-perfect website for a preschool.
- Built reusable UI components and ensured consistent layout and spacing across all sections.
- Focused on clean structure, accessible design, and accurate matching of the original UI.

EDUCATION

Bachelor's in Management Information Systems

Thebes Academy – 2022

Grade: Good with Honors

SKILLS

Technical Skills
– Languages: JavaScript (ES6+), TypeScript
– Frameworks & Libraries: React, Next.js
– State Management: Redux Toolkit, RTK Query, React Query, Zustand, Context API
– Styling & UI: TailwindCSS, Bootstrap, shadcn/ui, Flowbite
– APIs & Authentication: REST APIs, Axios, JWT Authentication, Protected Routes
– Tools: Git, GitHub, VS Code, Vite, npm, Vercel, Netlify
– Other: Responsive Design, Component-Based Architecture, Debugging, Performance Optimization

Soft Skills
– Problem Solving
–Teamwork
– Communication
– Time Management

Languages
– Arabic: Native
– English: Intermediate
